SUMMARY

I am an aspiring programmer, looking for a job opportunity. Currently studying at Fontys. Very social and friendly person, teamwork motivates me, and my main goal is to evolve and learn as a developer and as a person.

My background started with learning C++ during high-school. After moving to The Netherlands, next step was C# Windows Forms along with MySQL. Further on, I mostly focused on Web Development, exercising different frameworks. In the meantime I also learnt Java, creating a fullstack project with REST API and React frontend.

EXPERIENCE & EDUCATION

ICT & Software Engineering

Fontys University of Applied Sciences

2018 - 2023 Eindhoven, Netherlands

VOLUNTEERING

Coordinator

Artmania Festival, Artmania Events

2012 - 2017 Romania

- I was responsible for various tasks around the festival, most of them involving teamwork and communication between departments.
- I think my soft skills improved because of this, also learnt how important teamwork is.
