Eindhoven, Netherlands

Website/Link

## SUMMARY

I'm an aspiring programmer looking for an internship opportunity. Currently studying at Fontys. Very social and friendly person, teamwork motivates me, and my main goal is to evolve and learn how to work in an actual company, on an actual project.

My background started with learning C++ during high-school. Further on, moving to The Netherlands, the next step was C#, Windows Forms along with MySQL. After this, I focused mostly on Web Development, Exercising different frameworks. In the meantime I also learnt Java, creating a fullstack project with a REST API and a React frontend.

## EDUCATION

## VOLUNTEERING

### Coordinator

Artmania Festival, Artmania Events

2012 - 2017 Sibiu, Romania

- I was responsible for various tasks around the festival, most of them involving teamwork and communication between departments.
- I think my soft skills improved because of this, also learnt how important teamwork is.
